My name is Mattias Silva. I'm a freelancer specialised in editing, colour grading, cinematography and storytelling. I'm a member of the Swedish society of cinematographers and the Swedish society of film editors (*FSF, SFK*). With more than 20 years of experience in the film, television and most recently the games industry, I can be a great creative partner and help you realise your vision.

Growing up fascinated by stories, I always had a strong passion for films and storytelling. A passion that stills burns within me today, I love to express myself visually and creatively and to bring stories to life that have the power to move the audience in a profound way. I wish to continue to grow as a storyteller, collaborate with other creatives and to help bring amazing stories to life.

I also have my own Netflix Certified film equipment and post production suite for any project that may require them. I consider myself a fast learner, adaptable and able to work remotely or on site on any project of any size.

Thank you for your time and consideration, let's get together and tell a great story.
